Please review each agent and provide feedback on its output. There are several categories of feedback, each requiring specific information:

1. **Factual Errors:** If an agent produces factually incorrect output, please provide a screenshot along with a description of the error. This will allow me to determine whether the issue stems from an incorrect methodology in the AI's logic (e.g., misconfigured prompts or instructions), inaccurate data extraction from the source documents (a parsing issue), or an edge case requiring a more robust human-in-the-loop intervention.
2. **Output Quality:** If the output is suboptimal in scope or depth, please indicate what information you would expect to see. For instance, if the output is too granular or insufficiently detailed, that feedback will inform the necessary adjustments to the prompting or training.
3. **UI & Presentation:** If the formatting or visual presentation does not meet your expectations, please describe your preferred output structure or display.

Ready to Sell

WHERE YOU ARE

You've done the work. Now the outcome depends on the process — who's in the room, how offers are structured, and whether you have someone who's been on both sides of the table advising you.

WHAT WE DO FOR YOU

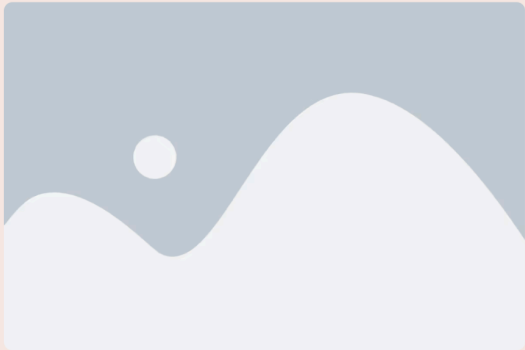

- ✓ Run a structured, competitive sale process with the goal of having multiple qualified buyers in competition — maximizing your sale price.
- ✓ Leverage direct relationships with PE-backed acquirers who are actively acquiring pet resorts across North America.
- ✓ Advise on every stage of the transaction to ensure you have expert advice adding value, and reducing complexity at every stage of the sale process.

DELIVERABLE

A Competitive Sale Process

A structured, multi-buyer process designed to drive competing offers — not a passive listing.

☐ Homepage - Considering a Sale

Considering a Sale

WHERE YOU ARE

You want to sell in the next 12-18 months, but have gaps to fill. You may need to “de-risk” your business or boost profitability to maximize your sale value.

WHAT WE DO FOR YOU

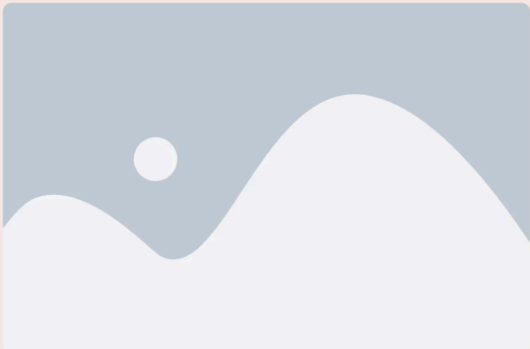

- ✓ Diagnose exactly which gaps are decreasing your valuation — financial, operational, or both.
- ✓ Work alongside you to normalize financials, strengthen your management layer, and reduce owner dependency.
- ✓ Prepare your business for the intensity of due diligence by a sophisticated buyer.

[LEARN ABOUT CONSULTING >](#)

DELIVERABLE

The Readiness Assessment & Valuation Roadmap

A clear, phased plan that closes the gap between where your business is today and what buyers expect to see.

☐ Consulting - Risk Mitigation

PROTECT YOUR EXIT

Eliminate Deal Issues Before They Happen

During diligence, buyers conduct a deep dive on every aspect of your business. Material issues identified during diligence may impact deal price or even deal closing certainty. We proactively audit the legal, operational, and compliance aspects of your business to identify these risks upfront.

KEY AREAS OF THE ENGAGEMENT

Property & Facility

- ✓ Lease assignment, and "red flags" analysis - if applicable
- ✓ Real estate sale or retention analysis and strategy - if applicable
- ✓ Buyer-ready facility audit

Compliance & HR

- ✓ Zoning and licensing compliance review
- ✓ Detailed contract review of suppliers, employees, and clients
- ✓ Assessing owner dependency from a "buyer's perspective"

THE WORKFLOW

- #### 01 Deep-Dive Audit

We review leases, real estate ownership information, contracts, and compliance documents to identify red flags.
- #### 02 Report and Recommendation Plan

We create a specific action plan to address each red flag proactively.
- #### 03 Diligence Defense

We organize a Diligence-Ready data room that will provide efficiency and clarity for all parties once you're ready to enter the sale process.

DELIVERABLES

The "Red Flag" Report

A prioritized list of material risks that may impact deal value and quality, and an action plan to address each one.

[SEE A SAMPLE REPORT >](#)

Diligence-Ready Data Room

We organize your key documents now, so you are fully prepared when starting the sale process. Highly organized data rooms provide efficiency for all parties, and signals professionalism to buyers.

Consulting - Profitability & Growth

PROTECT YOUR EXIT

Engineer a Higher Valuation Before You List

Buyers pay premiums for businesses with strong, documented profitability and reduced owner dependency. We identify the levers that move your EBITDA — and help you execute on them.

KEY AREAS OF THE ENGAGEMENT

Financial Optimization

- ✓ EBITDA normalization & add-backs analysis
- ✓ Revenue concentration analysis
- ✓ Expense rationalization review

Operations & Team

- ✓ Owner dependency reduction plan
- ✓ General Manager & key-person assessment
- ✓ Facility & capacity utilization review

THE WORKFLOW

- #### 01 Financial Deep-Dive

We normalize your P&L, identify add-backs, and benchmark your EBITDA against comparable sales.
- #### 02 Operational Assessment

DELIVERABLES

The Profitability & Valuation Report

A detailed breakdown of your adjusted EBITDA, valuation range, and the specific actions that will move your multiple higher.

Valuation Tab

1. It is highly likely that the LTM time period will not match up to the last fiscal year. This will result in the seller needing to upload the LTM financials as well as the last three fiscal years.

a. Can the AI manage this calculation?

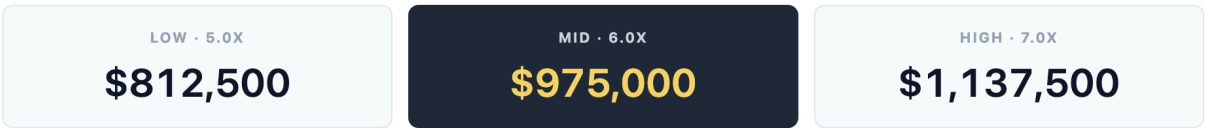

b. Have we accommodated for this in the document upload?
2. Can we make the list of Normalization Items in this chart expandable?
3. At the bottom of the summary table only use the mid range multiple to calculate each of the years Valuations

Multiple	5.0x – 7.0x	5.0x – 7.0x	5.0x – 7.0x	5.0x – 7.0x
Valuation	\$812,500 – \$1,137,500	\$1,082,500 – \$1,515,500	(\$914,185) – (\$1,279,859)	\$347,500 – \$486,500
Normalized EBITDA Margin	29.6%	39.4%	-48.8%	14.4%

4. For the current Net Income / EBITDA (Pre-Recast) line - replace the word “Pre-Recast” with “Pre-Normalized”

Net Income / EBITDA (Pre-Recast)	\$162,500	\$162,500	(\$87,500)	\$0
----------------------------------	-----------	-----------	------------	-----

5. The current valuation box below needs to be labelled as “LTM Valuation” - currently there is no wording for the reader to understand what time period this is referencing

6. On our Friday call, let’s discuss the sections currently titled “Baseline Valuation Report” and “WS2-2 EBITDA Recast” as I am not sure the purpose of the information being displayed where it is on the page

- Let’s discuss the purpose of this page and the value it’s adding to the overall Valuation analysis

Revenue Analysis

- There is an inconsistency in this analysis as the AI has flagged Boarding as a Critical risk of 100% in revenue (red banner) and yet in the chart analysis Boarding is listed as GREEN under Health

- ☒ In the portal, please change the title of this agent to "Material Contracts"
- ☒ For this agent, are the documents meant to be uploaded in the "Documents" section of the "Contract" agent or in the "Documents" tab of the main documents upload section?— all document upload will be on the client side once we finish with testing
- ☒ The information being summarized in the "Snapshot" tab is strong — the only different additional information that needs to be captured is whether there is a termination clause and the terms of termination.

Employee Obligations

V5 Comments - May 11

- ☒ ~~The Executive Summary needs to be re-designed – too cluttered~~

EXECUTIVE SUMMARY

The handbook establishes at-will employment relationships for all employees but does not provide specific workforce size, individual roles, or compensation structures. All employees operate under standardized handbook policies with no individual contractual protections identified. | Non-Compete Protections: ****Critical Gap Identified.**** No owner/seller non-compete agreement provided, and employee handbook contains no post-employment competition restrictions. This creates significant risk that the seller or key employees could immediately compete with the buyer post-close. The handbook includes confidentiality provisions but these do not restrict competition or solicitation activities. | Benefit Obligations: Under an asset sale structure, the buyer is not required to assume existing benefit obligations, but several benefits are contractually embedded in the handbook including PTO accrual, holiday pay, tuition reimbursement (up to \$5,000 annually per eligible employee), and paid leave policies. Health insurance and retirement plan obligations cannot be assessed without plan documents. | Retirement & PTO: No retirement plan identified in handbook. PTO liability exists but cannot be quantified without employee balance reports. Accrual rates suggest potential liability of 26-120 hours per employee depending on tenure. | IC Risk: Cannot assess without contractor agreements or payroll registers identifying 1099 relationships. | Transition: Under asset sale structure, buyer must make new employment offers to all desired employees. No WARN Act obligations identified (workforce size unknown). Key transition risks include: (1) lack of seller non-compete protection, (2) no employee non-compete restrictions, (3) high apparent owner-operator dependency, and (4) inability to assess specific key employee risks without individual agreements.

 - ☒ ~~The only question I have is regarding the flags~~
 - ☒ ~~Not quite sure what “Confirmed” vs “N/A” means~~
 - ☒ ~~And once I check one of these boxes, am I supposed to be able to re-run the report?~~

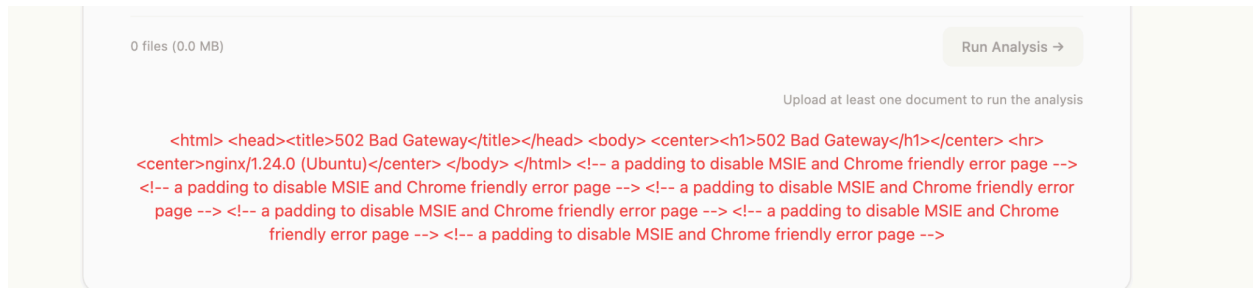

Confirmed has been changed to verified which means you verified this is a real flag and should be included in the report.

NA means you deemed the flag not applicable in this case

This is then used in the flag section of the report

1. How, and in what format, does this report get downloaded?
2. Regarding the AI analyzing competitors

- a. Regardless if key competitors are inputted by the Cantara rep, the AI should show all competitors within the specified distance range (i.e. 5 miles) - show on map
- b. If less than 5 competitors are listed, the AI should decide on the remaining balance of key competitors, to get to 5 total, and report on them in the Competitor Table and Competitor Profile

- ☒ For the client, Chethaka Lakshitha, I updated their location information in the Client Management tab, to a location, Rex Dog Hotel, in Vancouver BC. When I ran the Competitor Analysis agent, it identified the location in Seattle.
- ☒ Can we have an input field for the search radius (i.e. 5 miles vs 10 miles)?

- ☒ We should discuss the pet “category” that we want the competitive analysis run against i.e. boarding, daycare etc.
- ☒ We should also discuss what information we want to capture in the competitive analysis. Key items are:
 - ☒ Map showing the location of the target location and a mapping of all key competitors

- ☒ A Google Review/social comparison chart vs key competitors
- ☒ A comparison chart of service offerings i.e. boarding, daycare, grooming etc?

- ☒ Is it possible for the input fields to be in the same order as the waterfall fields?
 - ☒ For example, the Working Capital input fields to come after the Estimated Cash at Closing
- ☒ The yellow box color for item #s 13 and 14 should match item #s 10 and 12
- ☒ We should have this as a PDF output as well as an Excel output

V4 Comments - April 30

- ☒ Can we save the inputs for this agent and come back later during another session and run the analysis?
- ☒ Other Seller Cash Obligations
 - ☒ Make this field as a list of input items (like the Debt field)
 - ☒ In the Summary, list each of the inputs (again, like the Debt field)
- ☒ The Deferred Revenue / Prepaid Adjustment should be a deduction (not addition) to the seller cash balance
- ☒ In the Summary
 - ☒ Let's omit item #8—Cash Consideration at Close (Pre-Tax)
 - ☒ “Total Net Proceeds Pre-tax (incl. Deferred)”
 - ☒ include item #s i.e. “14”
 - ☒ Put a light yellow box around this field
 - ☒ “Estimated Total Proceeds on Sale (Post-Tax)”
 - ☒ include item #s i.e. “14”
 - ☒ Put a light (not dark) yellow box around this field

V3 Comments - April 22

- ☒ The Estimated Cash at Closing field
 - ☒ needs to be moved right below the Enterprise Valuation field on the left hand inputs section
 - ☒ Should be the #2 filed on the Net Proceeds Summary—Waterfall
 - ☒ Included in the Base Purchase Price
- ☒ The Estimated Cash at Closing and the Pre-Close Cash Distribution fields are effectively the same
 - ☒ Delete the Pre-Close Cash Distribution field
- ☒ Add a new field “Other Seller Cash Obligations”

- ☒ ~~This could include items like "Tenant Improvements" that the seller must pay for and will be a deduction to cash~~
- ☒ ~~Include this field in the Base Purchase Price calculation in the Net Proceeds Summary - Waterfall~~
- ☒ Tax Inputs
 - ☒ ~~Can we have the option for it to be a % or a \$ input for each tax?~~
- ☒ ~~Change the wording of "Payroll Taxes on Bonuses" to "Payroll Taxes on Management Bonuses"~~
- ☒ ~~Remove the R&W Insurance Premium field~~
- ☒ ~~In the Waterfall Summary, change~~
 - ☒ ~~"Estimated Cash to Seller (Post Tax)" to "Estimated Cash to Seller at Closing (Post Tax)"~~
 - ☒ ~~The Pre-close Cash Distribution field needs to be removed~~
 - ☒ ~~The taxes on the Withheld/Deferred \$ amount needs to be calculated and deducted, and a field for this added~~
 - ☒ ~~We need to add a new field "Estimated Cash to Seller on Withheld/Deferred (Post Tax)"~~
 - ☒ ~~Keep the "Total Net Proceeds Pre-Tax" field -- include the Deferred \$~~
 - ☒ ~~For the last line "Estimated After-Tax Proceeds"~~
 - ☒ ~~Change wording to "Estimated Total Proceeds on Sale (Post Tax)"~~
 - ☒ ~~highlight this with a yellow box~~

V2 Comments - April 20

- ☒ ~~The Estimated Cash at Closing should show as a line item in the Net Proceeds Summary - Waterfall~~
- ☐

V1

Enterprise Valuation

As this is an estimate, we should use the **mid range of the valuation**

Taxes

- Need an input field for taxes - one for state and one for federal
- This will be an manual input by the seller's accountant

Cash

- This field should be changed to "Estimated Cash at Closing"
- This will be an manual input by the seller's accountant

Debt

- In addition to the Total Debt, we need to provide a schedule of the historical debt and the \$ totals by item
- Along with the historical debt, we need to add a second field to estimate the debt at closing
 - To do this, I would recommend:
 - we have the AI calculate the debt payments over the past 90 days based on the historical financials, and determine the average monthly payment by item
 - we add a field estimating the number of months to close
 - have the AI calculate the estimated debt, by item, at close

Transaction Costs

- Other fees should be a field where the description of multiple inputs can be manually typed in along with the \$ values
- What is the Insurance Premium input?

Net Proceeds Summary

As you have modelled, this should be a schedule - the change should be that it needs to be more detailed showing the breakdown of all inputs (i.e. showing the outstanding debt line by line)

Notes

- On Monday's call, let's discuss the structure of the Summary tab in the Net Proceeds Template Calculator, including how we want to model it relative to the format used in the Portal Net Proceeds Calculator in my Google Sheet.
 -  Cantara_Seller_Net_Proceeds_Template_v8_FINAL.xlsm
- We need to include fields for:
 - Holdbacks
 - Escrow
 - Deferred revenue / Prepaid packages
 - Required Seller pre-closing capex / Tenant improvements
- For all fields, we should allow for a manual override of any entry

 REVENUE UPLIFT SUMMARY

Revenue uplift analysis cannot be performed due to the absence of seller pricing data. To conduct a meaningful analysis, Rex Dog Hotel's current pricing structure for daycare, boarding, and grooming services would need to be obtained through direct inquiry or additional website research. Once pricing is available, comparisons against Citydog! Club's rates could reveal potential optimization opportunities.

\$ Cannot be determined without seller pricing data

Total Estimated Annual Uplift

PRICING FLAGS

critical No Seller Pricing Data Available

Remove

Rex Dog Hotel's pricing information could not be extracted from the provided website evidence, preventing meaningful competitive analysis.

warning Limited Competitor Pricing Data

Remove

Only 2 out of 5 competitors had extractable pricing data, reducing the reliability of competitive benchmarking.

warning No Service Comparisons Possible

Remove

Without seller pricing data, no direct service-to-service comparisons could be performed against competitors.

1. Please change the name of this agent to include the word "Competitive"
2. The pricing that needs to be compared versus competition is detailed - https://www.downtowndoglounge.com/services/daycare?utm_source=google.com&utm_medium=organic#pricing
3. Let's discuss the most effective and efficient way to compile the pet resorts pricing

- a. AI searches the companies website and compiles a report that has to be signed off by Cantara
 - b. The seller uploads a spreadsheet with the pricing of all the various services and prices
- 4. Let's discuss
 - a. Which competitors to compare pricing to compare (use the 5 key competitors from the Competitor Analysis?)
 - i. Question - in the section of the portal where we ask the client to upload documents - do we want to ask them to name the top 5 competitors there to ensure that we capture this info for the various agents to use?
 - b. how to compile Competitive Pricing - FYI the Competitor Analysis does not provide detailed pricing by service type

Corporate Ownership Verification

Permits & Zoning

May 14 Comments - V1

- ☐ All fields need to be editable
 - ☐ The Executive Summary in the Report is “jumbled”
-

EXECUTIVE SUMMARY

Only one permit was identified in the uploaded documents — an Arizona Transaction Privilege Tax License that expired on December 31, 2022. This license is explicitly marked as "NOT TRANSFERABLE," meaning the buyer must apply for a new license. Critical permits for pet resort operations including kennel licenses, health department permits, fire department permits, and certificates of occupancy were not provided and cannot be assessed. | Zoning: The property is located at 1323 E Chandler Blvd #101-105, Phoenix, AZ 85048, within Maricopa County jurisdiction. However, no zoning verification documents were provided, making it impossible to assess whether the pet resort use is permitted by right, requires conditional use approval, or operates under grandfathered status. The business operates under the name "Foothills Pet Resort" at this location. | CUP: No conditional use permits were identified in the uploaded documents. For many municipalities, animal boarding and kennel operations require conditional use permits, particularly in commercial or mixed-use zones. The absence of CUP documentation represents a significant gap in the permit analysis. | Grandfathering: No grandfathering or non-conforming use documentation was provided. Without zoning verification, it cannot be determined whether the pet resort operates under grandfathered status or as a conforming use. This represents a critical risk area for the buyer. | Transfer: The Arizona Transaction Privilege Tax License must be re-applied for by the buyer as it is non-transferable. All other required permits for pet resort operations (kennel license, health permits, fire permits, occupancy permits) were not documented and their transfer requirements cannot be assessed. The buyer should expect to obtain new permits across all regulatory categories.
