

- ☐ Overview
 - ☐ Change the text under "1 - Assign Documents" to:
 - ☐ Tell us which documents you have, and then assign each document to yourself or a team member who will upload it.
 - ☐ Change the text in the "3 - Collection" to
 - ☐ Upload the required documents.
- ☐ Assign
 - ☐ I see the designed logic behind the UX - let's review together to understand if the UX is it as clear as it can be for the client
 - ☐ Change "1 - Do you have these documents" to "1 - Tell us which documents you have"
 - ☐ Change "2 - Assign Documents" to "2 - Assign documents to yourself or another team member"
 - ☐ In the "2 - Assign Documents" section
 - ☐ where does the client add an additional person to assign documents to?
 - ☐ How does the additional person get access to the portal?
 - ☐ Do the documents get uploaded to a Drive folder
 - ☐ In the "1 - Do you have these documents" section, we need to ensure that all the text descriptions are very clear for the user
 - ☐ For example, in the section below, the word "Upload" should be replaced with "Applicable" for this section to be as clear as possible

Building Permits (if renovation done)

Upload if any renovations have been done.

✓ Yes

✗ No

N/A

- ☐ In the "2 - Assign documents" section,
 - ☐ there are no explanations which would be helpful for the client
 - ☐ For certain documents that are not crystal clear regarding what is being asked for i.e "Employee List (titles, hours, compensation)" we should discuss adding a reference document for the client to download to see the format
- ☐ Note that in the Marcus Chen portal, there are several documents that are being asked for in "2 - Assign documents" which are not relevant
 - ☐ Sales Call Transcript - this is a Cantara responsibility
 - ☐ Active Customer Count - I am not sure what agent this is associated with

Sales Call Transcript / Recording	Required	— Assign to —
Payroll / Compensation Report	Required	— Assign to —
Revenue Breakdown by Service Line	Required	— Assign to —
Active Customer Count (last 12 months)	Required	— Assign to —

☐ Required Info

- ☐ If the client inputs info, and then clicks to another tab without using the "Save Information" button at the bottom, does the information save?
- ☐ There needs to be a greater delineation between the sections in terms of the info being asked - maybe bold the titles of the sections? I.e. Business Information, Digital Presence Inputs etc.
- ☐ The Facility Review has no title section currently
- ☐ The Facility Review needs more discussion as to how this will work for both the client and Cantara

☐ Collection

- ☐ For the Portal Sections nav bar, change the name to "Document Upload"
- ☐ I would recommend we put the "Document Upload" section before the "Required Info" section
 - ☐ My logic is that the Assign section is all about documents - it makes sense to put the Document Upload section right after that keeping all document related requests together
- ☐ For each document upload section i.e. Valuation Documents, the text at the bottom indicates that "Upload all documents in this section before submitting."
 - ☐ It's way more realistic that the client will have the documents in a piece meal fashion and upload them at different times. Can we change this functionality?
- ☐ For the fields that require multiple years of documents, the instruction is to "Upload file".
 - ☐ How realistic is that the client will have all the documents in one file when we're asking for multiple documents?
 - ☐ Let's discuss what's realistic regarding how the client will actually upload documents

- ☐ Additional Requirements
 - ☐ Let's discuss the exact functionality of this nav bar function, and then decide it's title
- ☐ Chat button
 - ☐ How, when, and where will the Cantara advisor receive the question?
 - ☐ How, when, and where will the client receive our response?
- ☐ Overall Progress
 - ☐ For the Overall progress at the top of the client page
 - ☐ does the # of documents submitted change depending on which documents the client indicates they have?
 - ☐ When we ask for three years of a particular document type, does this count as one document or three documents on the counter?
