Here is the breakdown of your specific action items and technical responsibilities from the meeting transcript, organized by area:

1. Client Management & Onboarding Flow

Add Call Step to Onboarding Timeline:

- Update the onboarding timeline in the client management area to include a step for the discovery call/recording. Place it in the designated calls section (the "pinned calls" area) so the team doesn't lose track of it.

Remove Marketing Questionnaire from Required Info:

- Remove the marketing activity questions from the "Required Info" section (since Gabby will now capture this via the recorded call).
- **Note:** Keep the **Digital Presence** section intact as is.

2. AI Agent Logic & Configuration

Process & Analyze Call Transcripts:

- Configure the agent workflow to ingest and analyze the uploaded audio/transcript from the GM/owner facility call using the predetermined framework.

P&L Marketing Spend Parsing:

- Program the agent to inspect the P&L:
  - If marketing spend is broken out **by activity/category** (e.g., SEO, AdWords, trade shows), have the agent parse and incorporate it.
  - If it is only a single lump-sum line item or unavailable, the agent should simply skip that breakdown (no need to duplicate valuation data).

Identify Growth Opportunities (Buyer's Lens):

- Ensure the agent frames gaps (such as underrepresented SEO or AEO—Answer Engine Optimization) as **growth/value-add opportunities** for prospective buyers rather than critical deficits.

Rename Agent in Dropdown Menu:

- Update the agent name in the UI dropdown to **"Marketing Performance and Digital Presence"** for consistency across the platform.

3. Client Portal Document Upload UI

Badge Styling Updates:

- Test updating the document type badges to **Cantero blue with white text** (replacing or differentiating from light green/light blue so it doesn't clash with the green checkmark upload status).
- Ensure consistent text formatting across badges (make sure types like **PDF**, **XLS** are **bolded**, matching the rest).

Remove Unsupported File Extensions:

- Remove `.webp` from the allowed document types (specifically noted under items like the fire permit). Strictly align accepted extensions with the approved list compiled by Aaliyah.

Instruction Copy Separation (Pending Review):

- Keep document types strictly inside badges and out of the description strings. Once the updated instruction copy for document descriptions (e.g., clarifying "36-month monthly P&L by month") is finalized tomorrow, update the UI helper text accordingly.
